

BD-305 AGATE KUTTER™ PREMIUM THIN-RIM LAPIDARY DIAMOND BLADE

The BD-305 Agate Kutter™ Diamond Blade has been designed to cut a variety of hard lapidary materials on high speed, water cooled tile and brick saws with minimal chipping.

The stiffening/cooling slots guarantee straight cutting in dense rock material such as quartz, agate, geodes, petrified wood and jasper as well as granite, marble and porcelain tile.

The ultra-thin rim design and patented cooling slots of the BD-305 reduce the amount of heat and resistance generated when cutting, providing for faster cutting speeds, less loss of material, and a higher quality finish.

BD-305 Agate Kutter™ Blade

Diameter	Width	Arbor	Part#
5" (127mm)	.050"	5/8"	305050
6" (152mm)	.050"	5/8"	305060
7" (178mm)	.050"	5/8"	305070
8" (203mm)	.050"	5/8"	305080
10" (254mm)	.050"	5/8"	305100
12" (305mm)	.080"	1"	305120
14" (356mm)	.080"	1"	305140
